

Lifelines

Lan Luo is a master degree candidate of School of Materials Science and Engineering at Zhengzhou University, Zhengzhou, China, majoring in leather chemistry and engineering. She is engaged in thermal degradation kinetic and mechanism of thermal degradation of leather and tannery wastes.

Jie Liu received his PhD degree in 2007 from Institute of Mechanics, Chinese Academy of Sciences, Beijing, China. He currently is an associate professor of School of Materials Science and Engineering at Zhengzhou University, Zhengzhou, China. From 2016 to 2017, he worked as a visiting scientist at ERRC, USDA in Cheng-Kung Liu's group. His current research interests focus on green composite materials based on natural polymers and their applications in packaging, biomedical and environmental fields.

Cheng-Kung Liu, see *JALCA* 94, 158, 1999

Eleanor M. Brown, see *JALCA* 93, 328, 1998

Fang Wang graduated from Zhengzhou University with a Bachelor degree in 1991. Since 1993, she has been working at School of Materials Science and Engineering, Zhengzhou University. She is now a senior engineer. Research activities focus on leather structure and properties.

Yadi Hu is a PhD candidate of School of Materials Science and Engineering at Zhengzhou University, majoring in the materials physics and chemistry. Her research focus on the degradation mechanism of modern and historical leathers under the effect of storage environmental conditions.

Keyong Tang received his PhD degree in 1998 from Sichuan University, Chengdu, China. He is working for Zhengzhou University as a professor of School of Materials Science and Engineering, Zhengzhou, China. His research interests include the leather structure and properties. He has published more than 100 papers, co-authored 4 books and edited 1 book in the field of leather chemistry and engineering.

Muhammad Naveed Ashraf received a MSc. in Organic Chemistry at University of the Punjab (1999), an MPhil. in Applied Chemistry at University of Engineering and Technology Lahore (2006), He is Ph.D. scholar in Polymer Engineering and Technology at University of the Punjab. His research interests focus on synthesis and applications of industrial polymers

Shahzad Maqsood Khan received a BSc. in Chemical Engineering at University of the Punjab (2003), a MSc. in Chemical Engineering

at University of the Punjab (2006), and a Ph.D. in Chemical Engineering at University of the Punjab (2016). He is currently a Professor of Polymer Engineering and Technology at University of the Punjab Pakistan. His research interests focus on synthesis and characterization of polymers, composites, membranes and allied materials.

Shahid Munir received a BSc. in Chemical Engineering at University of the Punjab (1993), a MBA in marketing at University of the Punjab (2003), a MSc. in Chemical Engineering at University of the Punjab (2007), and a Ph.D. in Environmental and Materials Engineering, University of Leeds, UK (2010). Now he is working in University of Jhang Pakistan. His research interests focus on biomass-coal co-combustion

Rashid Saleem received a M.Sc in applied chemistry at University of Engineering & Technology Lahore Pakistan (2004), a M.Phil in Applied Chemistry at University of Engineering & Technology Lahore Pakistan (2007), and a Ph.D. in Polymer Chemistry at GC University Lahore (2016). Now he is working in SRC PVT LTD as Senior Manager R&D. His research interests focus on synthesis of full range of leather, Textile & paper processing chemicals.

Alreza Koochakzaei is assistant professor of archaeometry and conservation of historic and cultural properties in Tabriz Islamic Art University, Tabriz, Iran. He received a BA in art conservation from University of Zabol and an MA and Ph.D. in conservation of cultural and historic properties from Art University of Isfahan. He was selected as top student of the country (Iran 2017). He has worked as a lecturer at the Art University of Isfahan and a conservator in the archaeological museum of Birjand. His scientific interests are mainly focused on conservation of artifacts made from organic materials, especially leather. Currently he is researching leather treatment methods and conservation of acid-deteriorated leathers. He is also interested in the development and application of FTIR spectroscopy for conservation purposes and the evaluation of biodeterioration and degradation mechanisms in historical objects made from organic materials.

Hossein Ahmadi obtained his BA in conservation and restoration of cultural properties at the Art University of Tehran in Iran in 1994 and also obtained his MA in conservation of historic-cultural objects at the Art University of Tehran in 1997. In 2009 he received his PhD degree from Polytechnic University of Valencia in Spain for his studies on conservation and consolidation of mosaic tiles. He is currently an associate professor of department for conservation of historic-cultural objects and head of faculty of conservation in Art University of Isfahan.

Mohsen Mohammadi Achachlouei is assistant professor of archaeometry and conservation of historic and cultural properties in Art University of Isfahan. He has also worked as a lecturer in Tabriz Islamic Art University and scientific advisor of Malek museum and library institution. He has focused on conservation of artifacts made from organic material and degradation mechanisms as his research fields.

Arun Gopinath completed his Masters in Biopharmaceutical Technology from Anna University, Chennai. He is currently pursuing his PhD at CSIR-CLRI. He has 8 research papers and 1 patent to his credit.

N. Vedaraman obtained his Ph.D. degree in Technology from Anna University, Chennai. He has been actively engaged in eco-friendly process development and scale up for chemical and leather sectors for more than thirty years. He has developed number of leather process methodologies aimed at by-product utilization and waste minimization. He has to his credit about 35 research papers and 10 patents.

R. Kirubakaran obtained Ph.D. degree in Zoology from Banarus Hindu University and worked as Scientist - G & Group Head for Marine Biotechnology Group, National Institute of Ocean Technology (Ministry of Earth Sciences), Chennai, India in the biotechnological field. He has developed various technologies pertaining to downstream processes in the field of Biotechnogy field. He has 246 research papers and 2 patents to his credit.

D. Magesh Peter obtained M. Sc. Degree from Manonmaniam Sundaranar University and is working as a Scientific Officer, Marine Biotechnology Group in National Institute of Ocean Technology (Ministry of Earth Sciences), Chennai India. He has been working in the field of downstream processes in the field of Biotechnology. He has 30 research papers and 1 patent to his credit.

Balaraman Madhan obtained his Phd from Anna University, and is currently Principal Scientist at the CARE division of CSIR-Central Leather Research Insitute. He has published nearly 100 articles in varied fields of research. His major research interests are waterless chrome tanning and development of eco-benign tanning agents.
