

Lifelines

S. Suresh is a post graduate in Chemistry and with over 12 years of experience in Analytical chemistry of leather and in particular specialized in the area of Hazardous Chemicals analyses. An expert in various Chromatography and Spectroscopic techniques.

N. Priya is a post graduate in Chemistry and with over 12 years of experience in Analytical chemistry of Leather and in particular specialized in the area of Hazardous Chemicals analyses. An expert in various Chromatography and Spectroscopic techniques.

R. Kunjitham is a post graduate in Chemistry and with over 33 years of experience in teaching and 10 years of research experience in crystal growth and electrochemistry.

Sujata Mandal is Principal Scientist in the CSIR-Central Leather Research Institute (CLRI), Chennai, India. Her research interests include analytical science, materials characterization and development of inorganic nanomaterials and nanocomposite materials for various applications. She has made notable contributions towards materials development, materials characterization, human resource development, and analytical services for the leather sector since joining CSIR – CLRI in 2011. Her research findings led to 3 patents and more than 50 research publications in National/International journals/books. Email: sujata@clri.res.in

Shri. Ravi Banithu is Technical Assistant at the CSIR-Central Leather Research Institute (CLRI), Chennai, India. His research interests include Leather and Footwear science, materials characterization, testing, evaluation, standardization of Leather, General Footwear, Safety footwear, Leather gloves, etc. He works towards the preparation of standard test methods for Leather and Footwear testing. He has a research paper published in the journal *Environmental Science: Processes and Impacts*. Email: ravibanothu@clri.res.in

R. Mohan is Chief Scientist at the CSIR-Central Leather Research Institute (CLRI), Chennai, India. His research interests include Research and Development in Leather and Footwear science. He has made notable contributions towards materials development, materials characterization, testing, evaluation, standardization of Leather, General Footwear, Safety shoe, Garments, Gloves, Leather goods etc. In preparation of standard and specification Bureau of Indian Standard (BIS) and ISO standards pertaining to leather and footwear. Member in ISO/ TC 216 & TC 94 and ISO TC 120 and CHD 17 & CHD 19 of BIS Committee. His research findings led to 5 patents and more than 50 research publications in National/International journals/books. Email: mohan@clri.res.in

Kalarical Janardhanan Sreeram is the Director, CSIR-Central Leather Research Institute (CLRI), Chennai, India, since December 2019. Dr. Sreeram is a fellow of the Royal Society of Chemistry, UK and the Society of Leather Technologists and Chemists, UK. He was the head of the testing facilities of the institute, where his contributions towards the development of test methods and achieving the ISO 17025:2017 standards were highly acclaimed. Dr. Sreeram has made important contributions to the Green Chemistry of Chromium, which has opened up new paths for better industrial management of this metal ion at the global level. He has received several awards and honors for his contributions to the field of scientific research. Dr. Sreeram has more than 100 research papers in National/International journals, 6 book chapters, 19 patents filed and 13 technology transfers to his credit. He is honorary faculty of Anna University and has guided 6 students for their doctoral dissertations. Email: kjsreeram@clri.res.in

Bindia Sahu, see JALCA 114, 359, 2019

A. Yasothai is a Research Scholar, Department of Chemistry, CEG Anna University, Chennai, India. She has expertise in the field of leather and leather chemical analysis. Her research interests include synthesis of polymer nanomaterials and characterisation, leather and biomedical applications.

GC Jayakumar is currently working as a Senior Scientist at Centre for Academic and Research Excellence, CSIR-Central Leather Research Institute, Chennai, India. His research interests include cleaner leather processing technologies and utilization of tannery wastes for developing by products.

S. Angyarkanny is currently working as an Assistant Professor, Department of Chemistry, CEG Anna University, Chennai, India. Her research interests are surface science, nanocarriers, drug delivery, polymer synthesis and characterisation, biopolymers and plastic waste management.

Swara V. Kanth is currently head and Senior Principal Scientist, Centre for Human and Organizational Resources Development (CHORD), CSIR-Central Leather Research Institute, Chennai, India. Her research interests include Leather biotechnology, enzyme technologies applicable for environmental applications, cleaner leather production, human resource development and skill development.
