The Long Rise of Algae Blooms

Nicole Perozek

Abstract — *In this presentation, I explain the problem with algae blooms in Lake Erie through discussing the causes and effects of this problem and how it affects the environment of that region through speaking and discussing graph about algae blooms.*

I. Summary

Algae blooms is caused by the lack of human care and their sloppiness to take care of their businesses and thoughts about their environment. This can be solved by regulating the waste production of nearby factories and by regularly cleaning up waste in the lake. That algae blooms cause disastrous effects to the lake Erie region, multiple issues causes these blooms from both countries of Canada and the United states and it has been a long term problem.
